TOOTHPASTE

Shweka toothpaste is powered with 4Life Transfer factor and key ingredients that clean and brighten your teeth with the fresh power of a minty gel with an antibacterial/antifungal effect.

Shweka  
TOOTHPASTE

# DID YOU KNOW?

- That most people don't brush their teeth long enough each day.
- Experts recommend brushing for two to three minutes each time you brush your teeth. Don't forget to change your toothbrush too!
- The American Dental Association recommends a new brush every three or four months, or even sooner if the bristles look frayed.

- ✓ Clove supports **anti-bacterial and anti-inflammatory properties**
- ✓ Experience the **long-lasting freshness of Menthol**
- ✓ Formulated to support **reduction in dental cavities**

Shweka  
TOOTHPASTE

**INGREDIENTS**

**4LIFE TRANSFER FACTOR**

- Promotes oral health with the immune support power of Transfer Factor
- Transfer factors are tiny messenger molecules that transfer Mother Nature's natural response information from one entity to another, such as between a mother and her breastfeeding infant.
- Helps educate immune system cells \*

## VITAMIN E - ANTIOXIDANT

- Vitamin E is a powerful antioxidant that helps gums for tissue healing.
- Relive soreness of the gums during infant teething

## CLOVE

- cloves have antibacterial, anti-inflammatory, antioxidant, and anesthetic properties
- Cloves contain a strong anesthetic known as eugenol which similarly works as an antiseptic to fight bacteria that may cause infections. That is why cloves are so effective at fighting cavities

## INGREDIENTS

### MINT & MENTHOL

- This great-tasting formula contains a refreshing mint flavor and no sugar
- Mint is linked with fresh breath, but it offers other benefits such as healthy gums and teeth.
- Mint contains anti-bacterial and anti-inflammatory properties that maintain oral hygiene.
- Menthol has pain-relieving and anti-inflammatory properties

# DIRECTIONS

- For best results, use twice daily (morning and night) or after meals.
- Children below age of 6 years should be supervised to minimize swallowing.
